

2/23/11

Highlighted Opportunities

These positions are for the GM plant outside in Newport, DE.

3 Production Leads (all descriptions are similar other than the fact that the lead areas will be Paint, Body and General Assembly. Relocation packages are available for the lead positions and salary will top out around \$150K depending on experience. Descriptions is as follows:

Job Summary:

Direct and manage all plant General Assembly operations with overall responsibilities for safety, production, quality, costs, and morale.

Primary Responsibilities:

- Direct and manage plant General Assembly operations for production, maintenance, quality and safety.
- Coordinate plant activities through the planning with departmental managers to insure the total manufacturing objectives are accomplished in a timely and cost effective manner.
- Develop and control costs, plans, and budget.
- Implement cost effective systems of control over capital, operating expenditures, manpower, and labor costs.
- Implement and drive continuous improvement activity.
- Ensure compliance for plant, corporate, governmental, and environmental standards.
- Establish and monitor overall area performance targets for safety, production, quality, costs, and morale objectives.
- Implement and maintain preventative maintenance programs.
- Incorporate shop floor organization and plant cleanliness in the responsible area.
- Provides direction, development and leadership to Staff and Group Leaders.

Qualifications and Education

- Bachelor's degree in related field and five years leadership experience in a team-based, manufacturing environment.
- Working knowledge of budgets and financial statements.
- Background with lean manufacturing methods, process improvement programs and procedures required.
- Experience with General Assembly Production Operations.
- Strong knowledge of Quality Systems as applied in General Assembly.
- Demonstrated strong leadership & teamwork qualities.
- Experience in maintenance/equipment operations.

The next priority position is a Production Engineer (Conveyor). This position also will require minimal travel between CA and to the international location. Relocation is not available for this position and the salary range is from \$85k-100k depending on experience. The description is as follows:

Job Summary:

Perform engineering duties in planning general assembly conveyors.

Primary Responsibilities:

- Develop benchmark systems in an automotive manufacturing environment to meet and exceed company goals and objectives.
- Develop the production process to ensure processes meet safety standards, quality standards, environmental, and OSHA regulations
- Create a continuous improvement environment to develop best in class production system
- Coordinate production trials for model changes
- Direct/assist plant engineering with diagnosis of conveyor breakdowns
- Coordinate team members and develop an environment of teamwork
- Coordinate activities with the teams to minimize production delays due to equipment issues
- Develop systems to meet KPIs(Key Performance Indicators) and analyze data to monitor performance and plan improvements
- Identify requirements for plant engineering and production resources to modify assembly systems to improve safety, quality, productivity, and cost
- Monitor safety, quality, cost, and productivity, with improvement activities for assigned areas of production
- Complete projects on schedule and within the annual administrative, operational, and capital budgets
- Provide direction and assistance to analyze production issues, propose countermeasures, and resolve issues
- Collaborate with other production departments, quality, production control, and engineering to provide best in class product quality
- Implement training plans to improve overall organizational capability of production department

Qualifications and Education

- Bachelor's degree in Electrical engineering or related field and eight to ten (8-10) years of experience with lean manufacturing methods, process improvement programs and procedures required. Experience with General Assembly production operations is required.
- Experience in friction, roller, power and free, EMS, and other conveyor types preferred with emphasis on conveyor layouts and design. ERP/MRP/EDI System Knowledge Implementation of engineering changes, Preventive Maintenance system development/management, Robotic controls, Assembly torque tools, Microstation or Catia design preferred.
- Knowledge of the practical mechanical applications of conveyors
- Knowledge of design techniques, tools and principles involved in production environment
- Knowledge of Quality Systems as applied in General Assembly

The final priority position is the Manager of Production Control and Materials (Manufacturing Resident Engineer). This position will require some travel both to CA and internationally. There is no relocation available for this position and the salary range is \$85k-100k depending on experience. The description is as follows:

Degree Preference: Industrial or Mechanical Engineering. Candidates without an engineering degree will not be accepted.

Targeted Years of Experience: 10-15. Will not consider candidates outside that range unless they are extremely special candidates.

Salary Range: Expected to be between 80K-95K (Some Flexibility Exists pending the candidate's experience)

Targeted Experience Wanted: Candidates with experience from Toyota, Ford, Honda, BMW, Mercedes, or other Asian Auto manufacturers are preferred for this role.

Job Responsibilities: This candidate will be responsible for supporting the body shop, paint department and general assembly areas of the manufacturing facility. In a perfect world we are looking for a candidate that has experience in all 3 areas. Prefer a candidate that has experience in the Body and General Assembly areas. This candidate will be the first Manufacturing Engineer at the Delaware site and will be supported by small teams of

consultants, HR, Accounting, and Process Engineers. The candidate will need to be extremely self sufficient and able to handle the responsibilities of reopening the once idol GM Boxwood facility. The facility will be refurbished, retooled, and re-staffed with all new personnel and equipment. The Manufacturing engineer will be working hands on in all of these areas. The candidate will have support from the Irvine CA headquarters in all areas of engineering from a design and development standpoint as well. This candidate will be responsible for taking those ideas and designs, and translating them to real world manufacturing in an efficient and safe manner for manufacturing at the facility. Typical responsibilities will include: Facility layout, assembly layout, equipment specification, vendor negotiation, subcontractor management/maintenance/selection. The candidate should have some type of background in CAD to perform basic designs and equipment layouts. The candidate will also be responsible for putting together proposals for Subcontractors, and suppliers. The candidate should have previous knowledge and experience working with suppliers and subcontracts for facility renovation.

Targeting Candidate Personality: Candidate will be expected to stand their ground against and with people that have 30 plus years of experience in the Auto industry. This candidate will be expected to support their ideas and theories with factual information and present their ideas and suggestions appropriately. The candidate will report to a manager in Irvine CA, so self sufficiency and management is a must. The candidate will need to be a highly accountable individual. We are also seeking a candidate that has the ability to persuade others around their ideas and wants.

Top 4 Skill Sets:

1. **Prior experience in Body/General Assembly/Paint department in a auto manufacturing facility**
2. **Experience with developing cutting edge ideas and processes within a premier automotive manufacturing company**
3. **Experience developing and writing proposals that relate to automotive manufacturing start-up, refurbishing, retooling, and/or opening of a new facility**
4. **Strong personality as described**

Travel Requirements: The candidate will be responsible for traveling to Irvine CA at least 1 time per month and potentially over to Finland when necessary. Finland is the only other manufacturing site and the candidate will be expected to learn from that location on set up of the Newport DE facility. Candidates should possess a valid passport for travel purposes. Travel length could range anywhere from a few days to a week in some cases.
